

National Socialism

Why is a National Socialist government the cure for a bankrupt and deteriorating US economy?

Many of us have never been asked this question. However, most of us believe the time has come for a change!!

The very existence, future, and well-being of our nation, people, communities, and children may depend on this very important question.

A National Socialist government WILL:

- Secure our borders to halt foreign invasion and mass illegal immigration
- Begin mass internment and deportation of illegal immigrants and other unwanted foreigners
- Dismantle the old perverse and corrupt two-party system 'democracy'
- Establish a transitional parliament with focus on a people's state
- Strengthen and maintain the middle class
- Implement a flat tax for every citizen. This will be a percentage based on income, in the nation's interest and to pay down the national debt.
- Be self-determined and become more independent of foreign entities
- Abolish interest-earning and war profiteering
- Drastically revise foreign policy
- Create work programs for the unemployed
- Re-organize current federal, state, and municipal institutions
- Educate, prepare, and empower our youth, while purging them of Marxist/Communist and liberal multicultural ideology
- Serve as the impetus for a national revival and economic restoration

We do not have much time! Join NSM in the struggle to free America from social and economic ruin!
